Provider Strategies

Opting Out Entirely

• North Platte & Grant as Examples

Narrowing Plan Participation

•Limit the number of MA contracts to influence beneficiary plan choice

Allowing Growth

• Feeling pressure to contract from the public or geographic location

Community Education

- Engage the public on what participation means
- What's allowed & acceptable education from providers?

Other Considerations

- Not Accepting vs. Not Participating
 - Not accepting" refers to choosing not to treat a patient under a specific plan, while "not participating" means no contract exists with the plan
- HMO/PPO
 - Impacts patient access, referral requirements, and out-of-network reimbursement

Authorizations vs. Benefits

• A service may be authorized, but the patient might not have benefits for it

By the way: The No Surprises Act (NSA) does not apply to MA
